DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (Claims 1-12) in the reply filed on January 17, 2006 is acknowledged.

Claims 13-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Currently, claims 1-12 are active.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on June 30, 2004 is being considered by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

Please cancel claims 13-20.

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record, whether taken alone or in combination, fairly discloses all the limitations as claimed.

Re claim 1, none of the prior art of record fairly discloses the following limitations in combination with the rest of the limitations in the claim: forming a damaged interface in said single orientation layer; bonding a wafer to said multiple orientation surface; separating said single orientation layer at said damaged interface, wherein a damaged surface of said single orientation layer remains; and planarizing said damaged surface until a surface of said first device region is substantially coplanar to a surface of said second device region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following prior arts of record disclose relevant teachings regarding the invention: Yamashita '420, Yamada '981, Yeo '646, Anderson '684 and Guarini '962 teach forming multiple orientation SOI substrates; Yi teaches exposing active regions by polishing back side of a device wafer; and Hanson '764 teaches separating a portion of a device wafer at a damaged

(hydrogen rich) interface. However, none of the prior art of record, whether taken alone or in combination, fairly discloses all the limitations as claimed.
